

HOSSEIN SHIRALI

Doctoral Researcher

Karlsruhe, Germany

hossein.shirali@kit.edu | shiralihosein1212@gmail.com

Google Scholar | GitHub | LinkedIn

RESEARCH INTERESTS

Computer vision and deep learning for biodiversity research, with a focus on automated insect digitization, species identification, and estimation of morphological traits and biomass. I develop AI workflows and integrate them into robotic imaging systems for ecological research and forest health surveillance.

CURRENT POSITION

Karlsruhe Institute of Technology (KIT)

Doctoral Researcher

Karlsruhe, Germany

Mar. 2023 - Present

EDUCATION

Karlsruhe Institute of Technology (KIT)

Ph.D. Candidate

Karlsruhe, Germany

Expected early 2027

Research: biodiversity research of invertebrates using deep learning methods.

- Supervised by apl. Prof. Dr. Christian Pylatiuk and apl. Prof. Dr. Markus Reischl.

University of Bologna

Master of Electronic Technologies for Big Data and Internet of Things

Grade: 110/110.

Bologna, Italy

Oct. 2021

Fields: statistics and architectures for big data processing and communications; signal acquisition and processing.

Shahid Chamran University of Ahvaz

Bachelor of Electronic Engineering

Fields: computer architecture, digital systems, and electronics.

Iran

2017

RESEARCH PROJECTS

Entomoscope and DiversityScanner

- Lead AI development for the Entomoscope photomicroscope and contribute to the DiversityScanner robotic ecosystem for high-throughput insect digitization and analysis.
- Design end-to-end deep learning pipelines for species identification, sex classification, orientation detection, and anatomical segmentation of morphologically challenging dark taxa.
- Collaborate with engineers, taxonomists, and ecologists to integrate AI workflows into robotic devices and transition systems from prototype to deployment.

InsectMorphoAI

- Develop an image-based software suite to estimate insect length, volume, and biomass from 2D images for large-scale ecological assessment.

FORSAID

- Contribute to the EU Horizon Europe project Forest Surveillance with Artificial Intelligence and Digital Technologies (Grant No. 101134200).
- Build deep learning classifiers for regulated forest pest species identification from trap images within WP3, "Digital technologies for ground detection and surveillance of regulated pests."

RESEARCH VISITS

Mila – Quebec Artificial Intelligence Institute

Montréal, Canada

Visiting Researcher

May 2026 - Aug. 2026

- Completed a research stay in Prof. David Rolnick's group, investigating fine-grained visual recognition, open-set detection, and cross-domain generalization.
- Compared foundation-model adaptation strategies, including BioCLIP 2.5 with LoRA and fully fine-tuned EVA02, and evaluated transfer across imaging systems.

INDUSTRY EXPERIENCE

Modis / Baker Hughes

Data Scientist Consultant

Italy, Remote

Feb. 2022 - Mar. 2023

- Developed an optimization algorithm to improve turbine maintenance efficiency.
- Led cloud data migration and implemented enhanced data security protocols.
- Built automation tools using Microsoft Power Platform and delivered internal O365 training.

Plasive Technologies

Junior Data Scientist

Bologna, Italy

Mar. 2021 - Sep. 2021

- Designed and trained CNN models for semantic segmentation of satellite imagery.
- Developed a carbon stock estimation method using remote sensing and data analytics, and constructed a multidimensional dataset for satellite image research.

Kiwitron

Machine Learning Intern

Bologna, Italy

Sep. 2020 - Jan. 2021

- Developed a semi-automatic image labeling method using point cloud data for my master's thesis; achieved state-of-the-art performance in image annotation tasks.

CONFERENCES AND PRESENTATIONS

Entomology Congress (DGaaE)

Geisenheim, Germany

2025

- Presentation: "AI-driven advances in Species Identification and Biomass Analysis"

27th International Congress of Entomology (ICE)

Kyoto, Japan

2024

- Presentation: "AI as a Catalyst in Entomological Research by Simplifying Species Identification"

Helmholtz Artificial Intelligence Conference

Düsseldorf, Germany

2024

- Poster: "Advancing Biodiversity Research with AI-Driven Automation"

Helmholtz Imaging Conference

Hamburg, Germany

2023

- Poster: "Automated Biodiversity Research"

SKILLS AND LANGUAGES

Machine learning and vision: Python, scikit-learn, TensorFlow, Keras, PyTorch, ONNX, OpenCV, YOLO

Infrastructure and tools: Docker, Kubernetes, Git, CI/CD, AWS, HPC/SLURM, Streamlit, Gradio, VS Code, Jupyter

Expertise: Deep learning, computer vision, model deployment, data and image analysis, neural network design, scientific computing, robotic imaging integration

Languages: Persian (native), English (B2), German (A2)
